Aldo 039;s NET Monitor Crack+

What's New in the?

The 4th ACOSA release (further ACOSA 4.0.0.0.4) is now available for download! The main changes compared to ACOSA 4.0.0.0.3 ACOSA 4.0.0.0.4: * A new interface has been introduced, allowing for a better visualisation of data. * Memory optimisation has been improved: you can now find memory leaks easier, and also reset the registry as you wish. * A new Windows interface has been introduced, based on PortableApps. * Performance improvements: ACOSA can now connect to internet with a lot less issues than previous releases (eg: buffer underflows are now rarer). * ACOSA will now log messages in the Debug->Logs file, in a text file. You can download the logs, or save it in the C:\ACOSA4 directory. * The interface now supports Windows Vista Aero (you must have a Windows Vista system and have enabled Aero in the Compatibility tab of the System Properties window). * A new 'Help' menu has been added. It provides information about new releases. * The program is now built using PEStudio 4.12, instead of the older version of 4.11 used in ACOSA 3.0.0.0.5. * ACOSA now has native support for version 5 of PortableApps.com. * Minor fixes and improvements. ------------------------------------- WARNING: This is an official release of ACOSA and the copyright of the programs contained within it are owned by ACOSA, the authors. These programs may be used on other computers, but the authors and ACOSA shall not be held responsible. Also note that these programs can't be sold or given away. ------------------------------------- By downloading this message, you agree to receive email with information on products, services and special offers. We may process information you provide or that you share with us for these purposes in accordance with our privacy policy. Latest version of Aldo's Net Monitor 15.12.2009 Description: The 4th ACOSA release (further ACOSA 4.0.0.0.4) is now available for download! The main changes compared to ACOSA 4.0.0.0.3 ACOSA 4.0.0.0.4: * A new interface has been introduced, allowing for a better visualisation of data. * Memory optimisation has been improved: you can now find memory leaks easier, and also reset the registry as you wish. * A new Windows interface has been introduced, based on PortableApps. * Performance improvements: ACOSA can now connect to internet with a lot less issues than previous releases (eg: buffer underflows are now rarer). *
